- (54) **Title:** METHODS AND SYSTEMS FOR FACILITATING DATA STORE MIGRATION

Figure 4

(57) **Abstract:** A method comprises providing a first data store interface package associated with a first data store, the first data store package comprising a first schema compatible with the structural representation of data in the first data store. The method comprises importing, by a first application, the first data store interface package, configuring the first application to write to the first data store in accordance with the first data store interface package, determining data to be written to the first data store, and writing data to the first data store according to the first schema. The method further comprises importing, by a second application or Application Protocol Interface (API), the first data store interface package, configuring the second application or API to read from the first data store in accordance with the first data store interface package; and after data has been written to the first data store, reading data from the first data store according to the first schema.
