(54) Title: APPARATUS AND METHOD FOR REPRODUCING CONTENT AND INFORMATION STORAGE MEDIUM THEREFOR

(57) Abstract: A content reproducing apparatus and method in which transferring of information and/or sharing system parameters between markup documents are enabled without heavily loading a central processing unit, and there is no need to define a new browser, and an information storage medium having a computer program therefor. The content reproducing apparatus includes a data storage unit storing and/or reading data and a presentation engine controlling the data storage unit according to a command program contained in an input markup document.
