

METHOD OF MANUFACTURING SUBSTRATE LAYERED BODY AND LAYERED BODY

ABSTRACT

A method of manufacturing a substrate layered body includes: a step of applying a bonding material to the surface of at least one of a first substrate or a second substrate; a step of curing the bonding material applied on the surface to form a bonding layer having a reduced modulus at 23°C of 10 GPa or less; and a step of bonding the first substrate and the second substrate via the bonding layer formed.
