(54) **Title:** CONTAINER FOR USE WITH A COUNTER MOUNTED DISPENSING SYSTEM

Fig 8

(57) **Abstract:** The present disclosure relates to a container for flowable material configured to be installed in a counter below an access hole. The container includes a first deformable portion and a second deformable portion. The first deformable portion defines a first cavity and has a sealable first cavity inlet. The second deformable portion defines a second cavity and is in flow communication with the first cavity. The first deformable portion is configured to deform to fit into the access hole when substantially no flowable material is therein and the second deformable portion configured to deform to fit through the access hole when substantially no flowable material is therein. The disclosure also includes a method of installing a container of flowable material in a counter below an access hole.
