ABSTRACT

According to embodiments of the present disclosure, a method for image capturing, apparatus, device and storage medium are provided. The method comprises: displaying a capturing interface, the capturing interface comprising a preview component and a capturing control; in response to capturing a first image displayed in the preview component using the capturing control, storing the first image, and maintaining the display of a real-time captured image in the preview component; displaying a first element corresponding to the first image in a predetermined area of the capturing interface; and in response to capturing a second image displayed in the preview component using the capturing control, storing the second image, and displaying at least a portion of the first element and at least a portion of a second element corresponding to the second image in the predetermined area of the capturing interface. Therefore, the embodiments of the present disclosure may improve the efficiency of image capturing.
