

**METHOD FOR MANUFACTURING NOVEL NITROGEN-CONTAINING
COMPOUND OR SALT THEREOF AND MANUFACTURING INTERMEDIATE OF
NOVEL NITROGEN-CONTAINING COMPOUND OR SALT THEREOF**

ABSTRACT

Provided are a method for efficiently manufacturing a nitrogen-containing compound, which is used for manufacturing a treatment agent for integrin-related diseases, or a salt thereof and a manufacturing intermediate of the compound or a salt thereof.

A method for manufacturing a novel nitrogen-containing compound or a salt thereof includes (1) a step of obtaining a compound represented by Formula [10] or a salt thereof through an amidation reaction; and (2) a step of deprotecting the compound represented by Formula [10] or a salt thereof.
