(54) Title: PREFABRICATED MODULAR FUEL DISPENSING SYSTEM

(57) Abstract

A prefabricated modular fuel dispensing system (10) comprising a foundation module (12) including an underground fuel reservoir (18) having a plurality of separate fuel storage compartments (32, 34, 36). A conduit containment trough (20) is attached to the underground fuel reservoir (18) to operatively house a corresponding plurality of fuel supply conduits (42) and fuel dispensing conduits (50) therein to feed fuel to and from the underground fuel reservoir. A fuel dispensing module (14) includes a pump island (22) to operatively support a plurality of fuel dispensing devices (24) thereon coupled to the plurality of fuel dispensing conduits (50). A canopy module (16) includes an upper canopy member (26) held in fixed spaced relationship above the fuel dispensing module (14) by a plurality of canopy support columns (28) secured to the underground fuel reservoir (18).
