(54) Title: DISPLAY SCREEN, DISPLAY DEVICE AND MOBILE TERMINAL

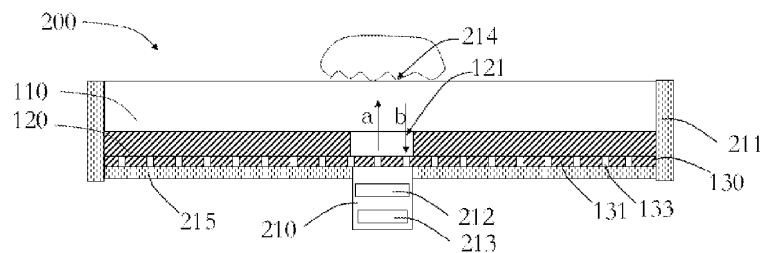

Fig. 9

(57) Abstract: Provided are a display screen (100), including a display layer (110) and a light shielding layer (120). The display layer (110) includes an upper surface (111) and a lower surface (112) opposite to the upper surface (111), the upper surface (111) faces a user, the light shielding layer (120) is arranged to the lower surface (112) of the display layer (110), and the light shielding layer (120) has a hole (121). Further provided are a display device (200), including the display screen (100) and a fingerprint module (210) disposed below the display screen (100). The fingerprint module (210) is located at a position corresponding to the hole (121). The fingerprint module (210) includes a light emitter (213) and a light inductor (212), and a light signal emitted by the light emitter (213) is transmitted to the fingerprint through the hole (121) and the display layer (110), and is received by the light inductor (212) after being reflected by the fingerprint. Further provided are a mobile terminal (300).
