

Abstract**Method for delivering a coffee beverage by centrifugation in a beverage producing device**

5

Method for preparing a short coffee extract from a capsule containing coffee powder, comprising: providing a capsule containing contains between 5.0 and 8.5 gram of ground coffee powder, injecting a liquid in the capsule; said liquid interacting with the coffee powder and centrifuging the capsule in a beverage producing device to force, by
10 effect of the centrifugal forces, the liquid coffee extract out of the capsule; such coffee extract being then collected, wherein the extraction of the liquid coffee extract is obtained by rotating the capsule within a speed range comprised within a range of 2500 to 7500 rpm.
