

ABSTRACT

Embodiments of the present application provide an image processing method, apparatus, and device, a computer readable storage medium, and a product. The method comprises: displaying in a content display page an image to be processed and an image processing control associated with said image, in response to a trigger operation of a user on the image processing control, displaying an image processing page, wherein the image processing page comprises said image, a size adjustment control and a description information determining control, obtaining a target size determined by the user by means of the size adjustment control, and obtaining target description information determined by the user by means of the description information determining control, and performing a size expansion operation on said image on the basis of the target size and the target description information to obtain a target image of the target size. Thus, a user can more flexibly adjust the image expansion size according to actual requirements, so that the generated target image is more in line with personalized requirements of the user.
