CLAIMS

1. A spirit drink, characterized in that, for 100 liters of said drink, it contains the following amounts of the following ingredients:

- 25 kg of sweetener made from sugar cane,
- 13 liters food-grade alcohol,
- 8 liters aromatic herb extract,
- 0.5 liters cedar flavor,
- 0.6 liters bergamot flavor,
- 0.11 liters of plant flavors,
- the balance of water

and characterized in that:

- said cedar flavor is obtained starting from the peel of the fruit of the Citrus medica plants, and
- said bergamot flavor is obtained starting from the peel of the fruits of the Citrus bergamia plants,
- the aromatic herb extract comprises as at least one of gentian, lavender, lemon balm and Roman chamomile.

2. A spirit drink according to one or more of the preceding claims, characterized in that said sweetener is of the natural type.

3. A spirit drink according to one or more of the preceding claims, characterized in that said sweetener is at about 65 °Bx.

4. A spirit drink according to one or more of the preceding claims, characterized in that said bergamot flavor is obtained by scraping or slow-folding from the fruits of the Citrus bergamia plants.

5. A spirit drink according to one or more of the preceding claims, characterized in that said bergamot flavor is obtained by grating fresh fruit peels of the

Citrus bergamia plants so as to obtain a pulp which is then pressed and/or filtered to obtain the essential oils of the bergamot flavor.

6. A spirit drink according to one or more of the preceding claims, characterized in that said essential oils of the bergamot flavor are diluted in a solution of alcohol and/or water and, after being mixed, they are subjected to a deterpenation process.

7. A spirit drink according to one or more of the preceding claims, characterized in that said cedar flavor is obtained by scraping or slow-folding from the fruits of the Citrus medica plants.

8. A spirit drink according to one or more of the preceding claims, characterized in that said cedar flavor based is obtained by grating fresh fruit peels of the Citrus medica plants so as to obtain a pulp which is then pressed and/or filtered to obtain the essential oils of the cedar flavor.

9. A spirit drink according to one or more of the preceding claims, characterized in that said essential oils of the cedar flavor are diluted in a solution of alcohol and/or water and, after being mixed, they are subjected to a deterpenation process.

10. A spirit drink according to one or more of the preceding claims, characterized in that said alcohol is of natural origin.

11. A spirit drink according to one or more of the preceding claims, characterized in that said water is osmotized and/or demineralized.

12. A spirit drink according to one or more of the preceding claims, characterized in that it has an alcohol content of about 20% vol.

13. A spirit drink according to one or more of the preceding claims, characterized in that it does not comprise artificial colors and/or preservatives.

14. A spirit drink according to one or more of the preceding claims, characterized in that it is stored and contained in a glass container.

15. A spirit drink according to one or more of the preceding claims, characterized in that it has a color which, overall, is substantially yellow.

16. A spirit drink according to one or more of the preceding claims, characterized in that it has a taste which is mainly bergamot.

17. A process for making the spirit drink according to one or more of the preceding claims, characterized in that it comprises the following steps:

- water is introduced into a first tank provided with a stirrer,
- the sweetener is introduced into the first tank,
- a first amount of alcohol is introduced into a second tank and in the alcohol thus introduced, the bergamot flavor and the cedar flavor are dissolved, mixed to obtain a mixed solution of said flavors and alcohol,
- a second amount of alcohol is introduced into the first tank containing water and sweetener and it is mixed,
- the aromatic herb extract is introduced into the first tank, which contains water, sweetener and alcohol and the whole is mixed,
- the mixed solution of said flavors herbs and alcohol, prepared in said second tank, is introduced into the first tank, which contains water, sweetener, alcohol and the aromatic herb extract and the whole is mixed.

18. A process according to the preceding claim, characterized in that, after introducing and/or mixing the mixed solution of said flavors and alcohol, prepared in said second tank, inside the first tank, containing water, sweetener, alcohol and the aromatic herb extract, further water or alcohol is introduced into the first tank to achieve an alcohol content of about 20%.

19. A process according to one or more of the preceding claims, characterized in that the final product obtained in said first tank is filtered in order to remove any residues and make it clear.

20. A process according to one or more of the preceding claims, characterized in that an amount of water corresponding to about 62.5 liters per 100 liters of final drink to be obtained is introduced into said first processing tank.

21. A process according to one or more of the preceding claims, characterized in that an amount of sweetener equal to about 25 kg per 100 liters of final drink to be obtained is introduced into said first processing tank.

22. A process according to one or more of the preceding claims, characterized in that a first amount of alcohol equal to about 3 liters per 100 liters of final drink to be obtained is introduced into said second processing tank.

23. A process according to one or more of the preceding claims, characterized in that an amount of cedar flavor equal to about 0.5 liters per 100 liters of final drink to be obtained is introduced into said second processing tank.

24. A process according to one or more of the preceding claims, characterized in that an amount of bergamot flavor equal to about 0.6 liters per 100 liters of final drink to be obtained is introduced into said second processing tank.

25. A process according to one or more of the preceding claims, characterized in that, together with said cedar flavor and said bergamot flavor, plant extracts, preferably in an amount equal to about 0.11 liters per 100 liters of final drink to be obtained, are introduced into said second processing tank.

26. A process according to one or more of the preceding claims, characterized in that an amount of aromatic herb extract equal to about 8 liters per 100 liters of final drink to be obtained is introduced into said first processing tank.

27. A process according to one or more of the preceding claims, characterized in that a second amount of alcohol equal to about 9.18 liters per 100 liters of final drink to be obtained is introduced into said second processing tank.

28. A process according to the preceding claim, characterized in that, during said steps, the stirrer of said first tank is always active, thereby stirring the ingredients which are added in a sequence into the same tank.

29. An improved spirit drink obtained by the process according to one or more of the preceding claims.
