

Ventilated window structure

Abstract

5

A ventilated window structure 100 is described herein. In a specific embodiment, the ventilated window structure 100 includes a first panel 101 having a ventilation opening 107, and a second panel 103 spaced from the first panel 101 and which occludes the ventilation opening 107 to define an inner airflow passage in fluid communication with
10 the ventilation opening 107. A method of assembling and fabricating a ventilated window structure 100 is also described.
