FACTOR ANALYSIS OF FLUCTUATION IN AMOUNT OF FUEL CONSUMPTION

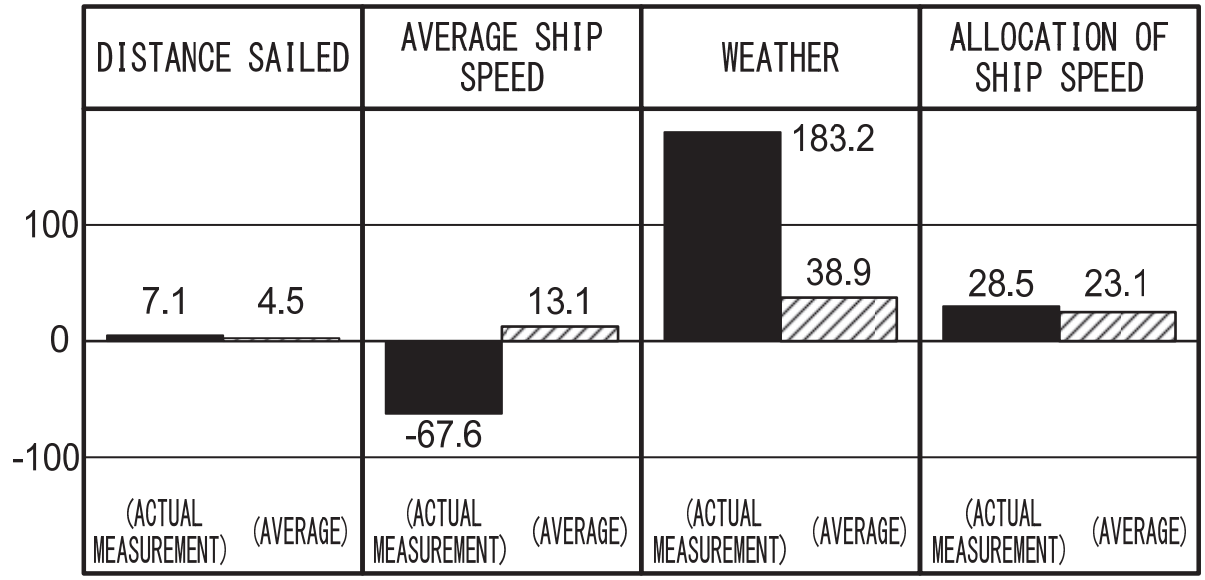

WEATHER CHART AND POSITION OF SHIP

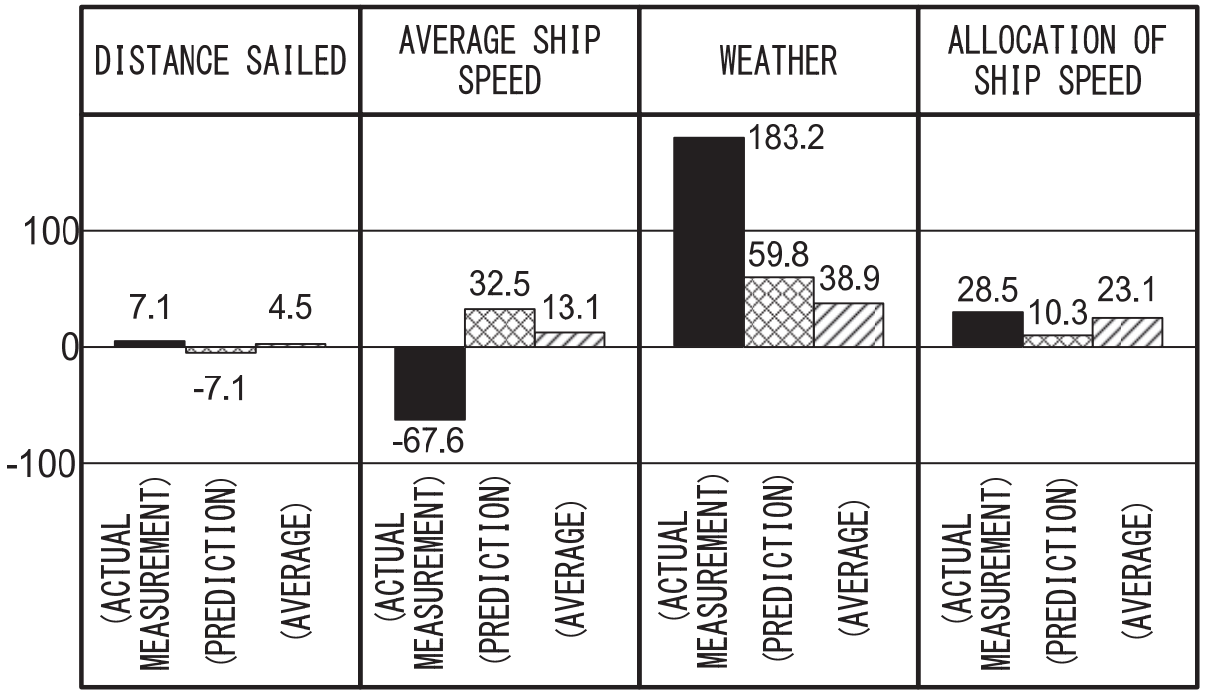

COMMENTS: IN THIS NAVIGATION, AN AMOUNT OF FUEL CONSUMPTION REACHES A TARGET AMOUNT OF FUEL CONSUMPTION + 80 TON AT PRESENT TIME. MAIN CAUSE OF INCREASE IN FUEL CONSUMPTION IS WEATHER CONDITIONS. ON THE OTHER HAND, SINCE A SHIP COULD SET SAIL FROM TOKYO SIX HOURS EARLIER THAN A PLANNED TIME, AN AVERAGE SHIP SPEED COULD BE REDUCED BY 0.4 KNOT. AS A RESULT, INCREMENT OF FUEL CONSUMPTION CAUSED BY WEATHER COULD BE REDUCED TO SOME EXTENT.
