

ABSTRACT

NECKLACE OR BRACELET WITH REGULARLY SPACED LINKS
ON A FLEXIBLE CONNECTING MEMBER

The links (1) are formed by a set of parts (3, 4, 6, 9, 15) including at least two caps (3, 4) including, on the one hand, means for assembling (13, 14;15) their feet (3b, 4b) to hold, between their heads (3a, 4a) a decorative casing element (9), and on the other hand, locking means (6, 16) at the junction of their feet (3b, 4b) for immobilising each link (1) on the connecting member.

The preferred embodiment includes a rigid tube (15) assembling the feet (3b, 4b) and holding a deformable insert locking the connecting member.
