(57) Abstract: Provided in the embodiments of the present application are a communication method and device for a multicast/broadcast service, related to the field of communications, and capable of saving network resource overhead. The method is such that: a terminal device determines a first multicast/broadcast service, the multicast/broadcast service being a multicast/broadcast service from which the terminal device is to exit; and the terminal device transmits a first message, the first message carrying identification information of the first multicast/broadcast service. The embodiments of the present application are applicable in 5G and other mobile communication

(57) 摘要: 本申请实施例提供一种组播/广播业务的通信方法和装置, 涉及通信领域, 能够节省网络资源开销。其方法为: 终端设备确定第一组播/广播业务, 第一组播/广播业务为终端设备待退出的组播/广播业务; 终端设备发送第一消息, 第一消息携带第一组播/广播业务的标识信息。本申请实施例应用于5G等移动通信系统中。
