(54) **Title:** SECURE HOLDER FOR COLLECTIBLES

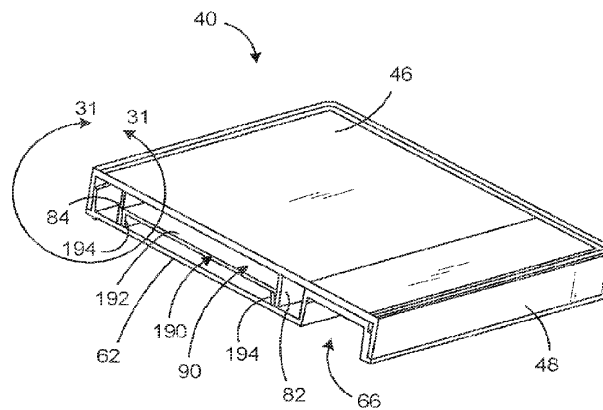

FIG. 30

(57) **Abstract:** A holder for storing a collectible, such as a stack of banknotes, having a first housing assembled with a second housing and defining an enclosed space therein. A collectible receiving structure is disposed within the enclosed space and spaced from an outer perimeter wall. One or more spacers can be added to the enclosed space in order to change an effective height of the enclosed space. A locking structure can keep the first housing assembled with the second housing, and can be configured so that an attempt to disassemble the first housing from the second housing will damage one or both of the first housing and second housing.
