

A B S T R A C T

IDENTIFICATION DOCUMENT COMPRISING A GUILLOCHE AND AN
ARRANGEMENT OF PIXELS

5

The invention relates in particular to an identity
document (30) including a transparent layer, a pixel
arrangement (19) in register with the transparent layer,
the sub-pixels being arranged so as to form lines (LN) of
10 sub-pixels in the pixel arrangement (19), and a guilloche
(GL) in a zone (Z2) adjacent to the pixel arrangement
(19), the guilloche including at least one guilloche line
(GL1, GL2), wherein the transparent layer is suitable for
being made locally opaque in order to impede the passage
15 of light, and wherein at least one guilloche line (GL1,
GL2), referred to as a "first" line, extends a line of
sub-pixels (LN), referred to as a "second" line, forming
part of the pixel arrangement (19) so that together they
form a single line.
