(54) Title: A WORKSTATION SYSTEM

(57) Abstract: This invention resides in a workstation system comprising at least one work area and at least one partition adjacent the work area. The partition having a plurality of demountable screens, at least one of the screens having a cavity fluidly connected to at least one aperture in the partition. A conduit having one end fluidly connected to the cavity and an opposite end fluidly connected to an air duct to communicate air from the air duct to the aperture.
