(54) Title: POURING PACKAGE AND POURING MEMBER

(57) Abstract: A pouring package for a fluid comprises a container (10) substantially impermeable to the fluid and having a pouring opening (11). The pouring opening is hermetically sealed by means of a breakable seal (30) in at least unopened state of the container. The container is provided with a pouring member (20) at the position of the pouring opening. Situated between a wall of the pouring member and the seal is a breaking member (21) which is awe and adapted to act on and break the seal when an external pressure is exerted on the wall.
