Using the Keys
activate unt deactivate the alarm
lock and unlock the truck
You use the keys to lock and unlock the truck doors and trunk.
To unlock the truck either insert the key into the keyhole and rotate it clockwise or double-click the unlock button on the keyfob.
To lock the truck either insert the key into the keyhole and rotate it counter-clockwise or double-click the Lock button on the keyfob.
When you lock the truck using the keyfob you also activate the alarm. To deactivate it click the Alarm button on the keyfob.
Locking and Unlocking the Doors
Locking and Unlocking the Doors
You can lock and unlock your doors using the keys or keyfob (see also Using the Keys) When you are not in the truck. From within the truck you can control the locks in several ways.
To set the child safety lock on a specific door open the door and move the safety lock to the locked position.
To open a door pull upward on the exterior handle or inward on the interior handle. To close a door push it firmly from the exterior or pull its stationary handle firmly on the interior.
To lock and unlock all doors press the lock or unlock control on either of the front doors.
