(54) Title: MAGNETIC SEALING STRIPS FOR DRAPERIES AND LININGS**(57) Abstract**

The invention is directed to a two panel drapery lining (210). Each panel (210) includes a vertical hem (212a, 212b) formed by folding over one vertical edge of each panel (210) and stitching (214a, 214b) along a vertical line so as to leave a channel (223) formed between the hem (212a, 212b) and an opposing portion of the panel (210). The vertical stitching line (214a, 214b) includes a gap so as to leave an opening (216) into the channel (223). A magnetic sealing strip (211) is removably disposable within the channels (223) by insertion into the channel (223) through the opening (216). When the panels (210) are overlapped, the inner vertical edges may be secured to each other by the magnetic sealing strips (211).
