(54) Title: SYSTEM AND METHOD FOR TRANSFERRING HYDRATED LENSES ON AN AUTOMATED LINE

(57) Abstract: A method of transferring a contact lens (310) from a first location to a primary package (330) includes transferring the contact lens (310) with an intermediate transfer member (300) to the primary package (330), wherein the transfer member (300) is sealed in the primary package (330) with the contact lens (310). Additionally, according to another of many exemplary embodiments, a system for transferring a contact lens (310) to a primary package (330) includes a contact lens (310) and a transfer member (300) associated with the contact lens (310), wherein an automated lens transfer device (258) is configured to couple the contact lens (310) and the lens transfer member (300).
