(54) Title: DERIVATIVES OF AZETIDINE AND PYRROLIDINE

(I)

(57) Abstract

The invention relates to a compound having formula (I) wherein A is an optionally unsaturated 5– or 6–membered ring, which may comprise a heteroatom selected from N, O and S and which may be substituted with oxo or (1–6C)alkyl; R^1, R^2 and R^3 are independently H, (1–6C)alkyl, (1–6C)alkoxy, (1–6C)alkoxy–(1–6C)alkyl, carbo(1–6C)alkoxy or halogen; X is O or S; and n is 1 or 2; or a pharmaceutically acceptable salt thereof, with the exception of 3–(naphth–1–yl–oxy)–pyrrolidin and 3–(5,6,7,8–tetrahydro–naphth–1–yl–oxy)–pyrrolidin. The compounds of the invention have antidepressant activity and can be used in treating or preventing serotonin–related diseases.
