

ABSTRACT

Provided in the embodiments of the present application are a classroom activity courseware producing method apparatus, and a storage medium and an electronic device. The method comprises: in response to a trigger operation for producing a classroom activity courseware, displaying a courseware producing page on a classroom activity courseware producing platform, and acquiring a target courseware type identifier, acquiring title text content, which is entered on the courseware producing page; obtaining a corresponding target structured analysis strategy according to the target courseware type identifier; parsing the title text content according to the target structured analysis strategy, so as to obtain structured classroom activity text content; and generating the classroom activity courseware according to the structured classroom activity text content. By means of the embodiments of the present application, a teacher only needs to enter title text content so that classroom activity courseware can be automatically generated, without the need for manually editing, one by one, content in each operation area of a classroom activity, such that the operation is simple and convenient, the courseware producing cost is reduced, and the courseware producing efficiency is improved.
