(54) Title: POWER SUPPLY SYSTEM AND DEVICE DRIVEN THEREBY

(57) Abstract: A power supply system generates supply electric power by using a power generation fuel. The system includes a fuel charged portion in which the power generation fuel is charged, a power generator which generates power generation electric power by using the power generation fuel, an output controller which operates or stops the power generator and, a start-up controller which supplies start-up electric power used for operating the output controller to the output controller.
