

A STYLUS AND HOUSING ASSEMBLY ASSOCIATED WITH A TOUCH SCREEN

ABSTRACT OF THE DISCLOSURE

5

A stylus and housing assembly (40) associated with a touch screen. The assembly has a telescopic stylus (1) having a pointer member (2) coupled to a handle member (3) to allow relative movement therebetween. There is also an
10 electronic device housing (16) with a touch screen display, the housing has an entrance (17) for an engagement member for releasable engaging the telescopic stylus (1). When engaging the telescopic stylus (1), the engagement member engages the pointer member (2) to
15 retract the stylus (1) during mounting to the housing and extension of the stylus during removal.
