

ANTI-DENGUE VIRUS ANTIBODIES AND APPLICATIONS THEREOF

ABSTRCT

The present invention relates to anti-virus dengue virus antibodies and
5 applications thereof. Specifically, the anti-virus dengue virus antibodies of the
present invention are serotype specific and useful for specific detection and
differentiation of various dengue virus serotypes in a biological sample. The present
invention also provide methods and kits for detecting dengue virus and methods and
compositions for use in diagnosis and treatment of dengue virus disease using the
10 anti-virus dengue virus antibodies as described herein.
