(54) Title: METHODS AND DEVICE FOR LIMITING BATTERY POWER CONSUMPTION IN A WIRELESS COMMUNICATION DEVICE

(57) Abstract: Systems, methods and apparatus are provided for limiting power consumption in a wireless communication device. The described aspects provide for power limiting thresholds to reserve power for, or limit power usage by, one or more predetermined applications executable by the wireless communications device. The described aspects are highly user-configurable, allowing a device user and/or a third party to define which applications have a battery power consumption limit or reserve, and the amount of battery power associated with the limit or reserve.
