

ABSTRACT

MEDICINE FILLING APPARATUS

5 Provided is a medicine filling apparatus used for filling a medicine
container with solid medicines, the medicine filling apparatus including: a
medicine housing unit configured to house the medicines; a plurality of rotors
configured to eject the medicines from the medicine housing unit by rotating; a
medicine guide path configured to guide the medicines ejected from the
10 medicine housing unit by the plurality of rotors to the medicine container; a
drive unit configured to rotationally drive the plurality of rotors; and a control
unit configured to control the drive unit.
