| Track Chunk        |                            |                                     |
|--------------------|----------------------------|-------------------------------------|
| type               | length                     | Data                                |
| 4 bytes<br>(ascii) | 4 bytes<br>(32-bit binary) | <- length bytes -><br>(binary data) |
| MTrk               | <length>                   | <delta_time><event> ...             |

FIG. 6

FF <type> <length> <data>

where:

<type>

is a single byte, specifying the type of meta-event.

The possible range is 00-7F. Not all values in this range are defined, but programs must be able to cope with (ie ignore) unexpected values by examining the length and skipping over the data portion.

<length>

is the number of bytes of <data> following.

This is a variable length quantity

0 is a valid <length>

<data>

zero or more bytes of data
