

ABSTRACT**METAL SEAL COMPRISING A TEXTURED OUTER SEALING LAYER**

5

The invention relates principally to a static metal seal (1) comprising an outer sealing layer, wherein the outer sealing layer comprises a textured surface (3) that is configured to come into contact with the surfaces that are to be sealed, said textured surface (3) comprising a network of depressions (4) spaced apart from one another on the textured surface (3), wherein the depressions (4) are blind, do not pass all the way through the outer sealing layer, and do not communicate with one another.
