(54) Title: PORTABLE ELECTRONIC DEVICE

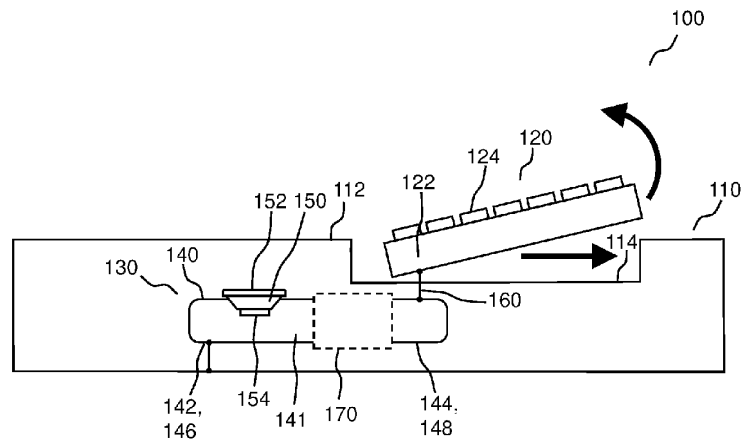

FIG. 1B

(57) Abstract: A portable electronic device including a main housing having a flat surface; a keyboard assembly movable relative to the flat surface between a stowed position and a deployed position; and a speaker assembly. In the stowed position, the keyboard assembly is oriented parallel to or coplanar with the flat surface. In the deployed position, the keyboard assembly is oriented non-parallel with respect to the flat surface. The speaker assembly including an expandable speaker box, and a speaker driver mounted thereto. A first portion of the expandable speaker box is associated with the main housing and a second portion of the expandable speaker box is associated with the keyboard assembly. The expandable speaker box is expanded from a contracted state to an expanded state when the keyboard assembly is moved from the stowed position to the deployed position.
