

Abstract

What is described are BET protein-inhibitory, in particular BRD4-inhibitory 2,3- benzodiazepines of the general formula (I)

5

in which R^{1a} , R^{1b} , R^{1c} , R^2 , R^3 , R^4 , R^5 , A and X have the meanings given in the description, intermediates for preparing the compounds according to the invention, pharmaceutical compositions comprising the compounds according to the invention and their prophylactic and therapeutic use for hyperproliferative disorders, in particular for tumour disorders. Also described

10 is the use of BET protein inhibitors for benign hyperplasias, atherosclerotic disorders, sepsis, autoimmune disorders, vascular disorders, viral infections, for neurodegenerative disorders, for inflammatory disorders, for atherosclerotic disorders and for the control of male fertility.
