(72) Inventors: **RIZVI, Farrukh Raza**; c/o Razer (Asia-Pacific) Pte. Ltd., Razer SEA HQ, 1 one-north Crescent, #02-01, Singapore 138538 (SG). **GWEE, Chang Sern**; c/o Razer

(54) Title: AN INPUT DEVICE

FIG. 1

(57) Abstract: In some aspects, an input device may include a switch having an activation element, a button disposed relative to the switch, and an obstruction member movable between a first position and a second position. The button may be depressible from an undepressed position to a depressed position to engage the activation element when the obstruction member is in the first position, and the button may be blocked from being depressible to the depressed position when the obstruction member is in the second position. The input device may also include a selector operable to cause the obstruction member to move between the first position and the second position and a motion changing arrangement operatively arranged between the selector and the obstruction member to transform a motion of the selector into a motion of the obstruction member for moving the obstruction member between the first position and the second position.
