A CABLE ENTRY DEVICE

ABSTRACT

A cable entry device adapted to be fixed to a wall which has a hole through it provided for this purpose, said device including:

- 5 - a threaded first part;
- a threaded second part adapted to be screwed onto said first part; and
- cable-holding means incorporated in said second part.

10 The first part takes the form of a base to be pushed blindly through said hole, said base including flexible teeth for clamping the wall between said second part and said teeth, and fixing the device to said wall blindly.
