(54) Title: VERTICAL CABLE MANAGEMENT SYSTEM WITH RIBCAGE STRUCTURE

(57) Abstract

A cable management system is provided including a mounting fixture for holding telecommunications equipment, and a ribcage cable support member along a vertical side of the mounting fixture. The ribcage cable support member includes a plurality of forwardly and rearwardly extending ribs. The ribs each include cable retention tabs. A plurality of spools are provided for cable storage on the ribcage cable support member. Holes through the ribcage cable support member allow access between the front and rear portions. An additional mounting fixture may be positioned on an opposite side of the ribcage cable support member to the first mounting fixture, and two columns of ribs are provided.
