(54) Title: POROUS ADSORPTIVE OR CHROMATOGRAPHIC MEDIA

(57) Abstract: A porous substrate capable of adsorptive filtration of a fluid having a porous self-supporting substrate and one or more porous, adsorptive polymeric coatings comprising from about 1 to about 80% of the void volume of the pores of the substrate. The resultant substrate has good convective and diffusive flow and capacity. The substrate may be cross-linked, have one or more capture chemistries attached to it and is useful as a chromatography media for the selective filtratin of desired species including biomolecules such as proteins and DNA fragments.
