

AGITATING AND MIXING DEVICE AND METHOD FOR PRODUCING
SEMICONDUCTOR SEALING RESIN COMPOSITION

ABSTRACT

5 An agitating and mixing device 1 of the present
invention includes a container 2 for storing the composition, an
agitating member 3 for agitating the composition, which is
inserted in the container 2, and a driving device 4 for
10 vibrating the container 2. The agitating member 3 has a rod-
like portion 32 having one end portion and another end portion,
a plate-like portion 31 provided on the one end portion of the
rod-like portion 32 and the grip portion 33 provided on the
other end portion of the rod-like portion 33. The plate-like
15 portion 31 is perpendicular to the rod-like portion 32. The
agitating member 3 is configured to agitate the composition by
spacing the plate-like portion 31 apart from the bottom surface
of the container 2.
