

Abstract

Pesticide preparations comprising copolymers

The invention relates to pesticide preparations comprising copolymers obtainable by copolymerization of

- a) glycerol
- b) at least one dicarboxylic acid and
- c) at least one monocarboxylic acid c) according to formula (I)

where R^1 is $(\text{C}_5\text{-C}_{29})$ -alkyl; $(\text{C}_7\text{-C}_{29})$ -alkenyl; phenyl or naphthyl.

The copolymers effect an increase in the bioactivity of the pesticides.

The pesticides are preferably herbicides.
