(54) Title: BOXER TRUNK WITH TRIANGULAR-SHAPED TENSIONED STRUCTURE

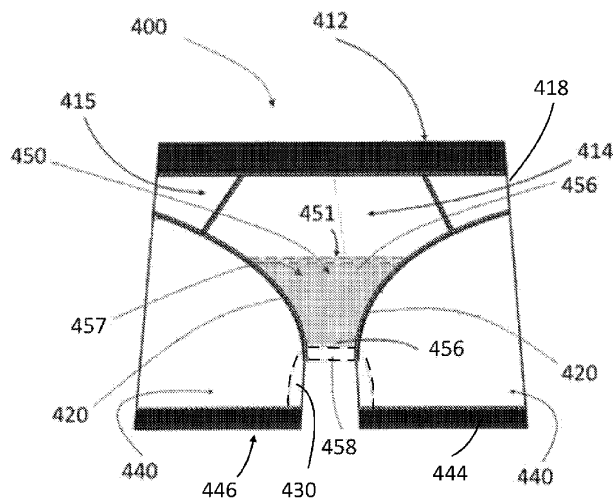

Fig. 10

(57) Abstract: An underwear garment (400) including a brief structure (410) including an upper elasticised loop or band (412), and front and rear webs of material (414, 416). A genital portion (450) extends downwardly from the waistband (412). The brief structure is defined at its lower limits by a pair of preferably elasticised seam lines (420), each defining a loop for a leg hole. The garment (400) further includes the boxer trunk portion (440) including a pair of tubes (441a, b) of material. The seam lines (420) extend diagonally upwardly from the crotch (453) toward the upper sides (418). The seam lines (420) apply to provide a genital portion (450) with an upwardly diagonal tension T1 toward upper sides (418).
