(54) Title: TECHNIQUES FOR NETWORK REPLICATION

FIG. 1

(57) Abstract: In response to a request to duplicate a network, the network is duplicated. The duplicate network includes one or more virtual devices that correspond to one or more devices in the network being duplicated. The devices of the duplicate network are communicatively arranged in a manner consistent with a topology of the network being duplicated. Once the duplicate network is created, access to the duplicate network is provided.
