(54) Title: CUSTOMIZABLE EXPANDABLE STORAGE SYSTEMS FOR THE HOME

FIG. 22

(57) Abstract: A modular storage system is described. A module includes a back panel, a left and a right side panel, and a top and a bottom panel. The side panels have a substantially flat outer side and a ridged inner side comprised of alternating evenly spaced pins and tails. Multiple modules are connected to each other through various connector means that slidably insert into the tails of the side panels. Various storage inserts are slidably insertable into the tails of the side panels. The configuration of the modules and the inserts are customizable.

**Declarations under Rule 4.17:**

— *as to the identity of the inventor (Rule 4.17(i))*
