

ABSTRACT

An identity verification method and device, an electronic device and a storage medium are provided. The method includes that: a face image of an object to be verified is acquired; responsive to the condition that the face image is included in a predetermined face image library, a target verification mode for the object to be verified is acquired; and the object to be verified is verified according to the target verification mode to obtain a verification result. With adoption of the disclosure, the security of admission or restriction for a target object may be improved.
