Stabilized thermoplastic molding compositions

Abstract

5

Thermoplastic molding compositions comprising, as substantive components

- 10 A) from 29% by weight to 99% by weight of at least one thermoplastic polymer,
- B) from 1 ppb to 5% by weight of at least one polyethyleneimine homo- or copolymer,
- 15 C) from 0.05 to 2% by weight of at least one sterically hindered amine compound,

and also

- 20 D) from 0 to 70% by weight of other additives,

where the percentages by weight of components A) to D) always give 100%.
