

ABSTRACT OF THE DISCLOSURE

ANTISTATIC COMPOSITION, MOLDED PRODUCT, ANTISTATIC PAINT,
ANTISTATIC COATING, ANTISTATIC ADHESIVE, AND METHOD OF
5 PRODUCING THE ANTISTATIC COMPOSITION

An antistatic composition contains an ambient-temperature molten lithium salt dihydrate, and one of a polymerizable compound, a plastic resin, an elastomer and an adhesive resin in which the lithium salt dihydrate is
10 dispersed. The lithium salt dihydrate contains two types of lithium salts with different molecular weights from each other. The two types of the lithium salts are selected from a group of lithium salts each containing an anion having a fluoro group and a sulfonyl group.
