(54) Title: METHODS FOR PRODUCING A COMESTIBLE FOOD BASE

Fig. 2

(57) Abstract: The present disclosure describes methods for producing a comestible food base from expended cell culture media previously utilized during cultivation of a cell-based animal food product. Generally, the disclosed method comprises growing animal cells within a bioreactor system by circulating a cell culture media through the bioreactor system, extracting circulated cell culture media from the bioreactor system, and producing the comestible food base by integrating one or more supplemental ingredients with the extracted cell culture media.
