

WIRELESS COMMUNICATION DEVICE AND WIRELESS COMMUNICATION METHOD

ABSTRACT

5

[Object] To provide a wireless communication device and a wireless communication method capable of reducing an inequality of transmission opportunities occurring when a carrier sense level is changed.

[Solution] A wireless communication device includes: a wireless
10 communication unit configured to perform wireless communication with another device; and a control unit configured to set a first carrier sense level and control a parameter used by the wireless communication unit to transmit data based on a comparison result between the set first carrier sense level and a second carrier sense level which is a default.
