ABSTRACT

A Collapsible Container

5 A collapsible container is disclosed as having a number of walls
which are movable relative to one another between a collapsed
configuration in which at least a major surface of at least two
of the walls are in contact with each other, and an expanded
configuration in which the walls define a cavity adapted to receive
an article, e.g. cans or bottles of soft drinks and beers, and the
10 walls contain a casing containing saline water.
