

**SECONDARY BATTERY MANAGEMENT DEVICE AND SECONDARY BATTERY
MANAGEMENT PROGRAM**

ABSTRACT

A secondary battery management device (100) is
5 connected with electronic equipment (210) using a secondary
battery as a driving power supply via the Internet (212).
The secondary battery management device (100) acquires
performance information of the secondary battery from the
electronic equipment (210), and measures a degradation level
10 of performance of the secondary battery during a
predetermined unit period. The secondary battery management
device (100) calculates a use fee of the secondary battery
for the unit period depending on the degradation level. The
secondary battery management device (100) may notify a user
15 of the electronic equipment (210) of the replacement timing
of the secondary battery, estimation of future degradation
of the secondary battery, and the like.
