
Obtaining a subset of data points, which is arranged in compliance with a given pattern informative of a certain type of target
2100
Obtaining a second set of data points which correspond to data points determined by the detection system and classified by the detection system as not corresponding to a target
2110
Determining one or more second data points of the second set of data points, such that the subset of data points and the one or more second data points are arranged together in compliance with the same given pattern
